

In the Abstract:

Rewrite the Abstract as follows:

~~The invention relates to a~~A pneumatic spring system for a vehicle, ~~which is~~ embodied as a partially closed system, wherein, air can be suctioned from the atmosphere and/or air can be dispersed into the atmosphere, ~~if~~as required. ~~Said~~The pneumatic spring system ~~comprises one~~includes a first component (4) ~~which is connected to the atmosphere.~~ ~~The inventive pneumatic spring system enables more efficient regeneration of the air dryer.~~ The first component (4) is used exclusively for suctioning air from the atmosphere, ~~and at least one~~A second component (2) ~~which is connected to the atmosphere,~~ is used exclusively for dispersing compressed-air into the atmosphere. ~~Preferably, the invention can be used in pneumatically sprung passenger vehicles.~~
